
Haal-e-dil movie download in hindi 720p At the very beginning of the film, we see a close up of a wrench and some cutters and then traces of oil leaking on to two photos: one of Yash Chopra and one of Manmohan Desai. The movie is opening with showing what happens before the leads' romance begins. This is a new beginning for Priyanka Chopra's lead roles. She's not just playing herself anymore but has transformed into many new personalities that she has never explored before in her acting career, such as Madhu Shalini Roy, Usha Raichand and Amrita Dixit Roy. This might not be a great setup for a romantic film, but it is quite entertaining. It's good to see Priyanka Chopra playing all these different roles. Her expressions, dialogue delivery and even her physique have changed from her previous looks in the movies. Yash Chopra's special effects are excellent and the film gets a little iffy when a close up of a person is shown in front of the screen with the background going black. It happens when Yash Chopra goes into flashback mode and that continuity error does seem distracting at times. The movie is a love story or a love triangle. It has humour as well as moments of suspense. But there's more to it than just the romance and comedy elements. The film also seems to be a message for those who have been through fame and celebrity life. Priyanka Chopra plays so many roles in the film that she easily might have been confused about which role she has just played. The movie title 'Haal-e-dil' means a thousand attempts. This film is the highest grosser of all time for Yash Chopra and his biggest production yet, netting him 80% of the movie rights on DVD. Haal-e-dil movie download in hindi 720p Haal-e-dil movie download in hindi 720p Haal-e-dil movie download in hindi 720p Anurag Kashyap (credited as Anurag Kashyap Mehta) has made a cameo appearance in the film. Akshaye Khanna appears on screen for just three minutes, but he manages to get his character noticed. The cinematography of the film speaks of better production values than most Bollywood films. The music of the film is marvelous. The songs are melodious and have been choreographed to perfection. Both Usha Uthup and Shaan have made a mark in the film. Shankar Mahadevan's music is melodious, romantic, soft and has interesting guitar play. The other musicians are equally good, making the composition of the background music worthy of attention. The lyrics are well-written too.

The film won 4 Filmfare Awards in 2007 - Best Movie, Best Performance in a Leading Role (Female) for Priyanka Chopra, Best Performance in a Supporting Role (Female) for Deepika Padukone and Best Music Director for Shankar-Ehsaan-Loy..
